DAVENPORT UNIVERSITY LAUNCHES MASTER OF SCIENCE IN HEALTH INFORMATICS AND INFORMATION MANAGEMENT DEGREE

GRAND RAPIDS, Mich., Nov. 7, 2013 – Davenport University’s College of Health Professions is launching a new **Master of Science in Health Informatics and Information Management** (MSHIIM) degree program in the Winter 2014 semester, available in-seat and online. No other university in Michigan offers this specific degree, which is based on the needs of healthcare professionals working in the field.

“Davenport’s College of Health Professions is excited to offer this new and innovative addition to our list of graduate-level programs,” said Dr. Karen Daley, Dean of Davenport’s College of Health Professions. “This degree will prepare practitioners for advanced careers and leadership roles related to the information-dependent environment of healthcare.

The MSHIIM degree is an interdisciplinary program providing a unique blend of business, technology and health care graduate education for current health systems environments. Reflecting the most contemporary practices in the field, the program is structured to provide experiences in the development, implementation, and maintenance of information and data systems, data analysis, privacy and security and strategic and operational resource planning.

About Davenport University

Founded in 1866, Davenport is a private, non-profit university serving nearly 11,000 students at campuses across Michigan and online. With tuition among the lowest of all private universities in the state, Davenport provides high academic quality, small class sizes, conveniently located campuses, faculty with real-world experience and more than 50 dynamic undergraduate and graduate programs addressing in-demand careers in business, technology and health professions. More information is available at www.davenport.edu.
